CIPPS Report Downloads

Introduction Build report download requests by specifying which data (data field selection) will be downloaded from which available report(s) (report selection). The selected data fields come directly from the specified report(s). Report and data field selections must be entered each time the download is executed; report requests cannot be saved as templates and re-executed following nightly data refreshing.

Selecting a CIPPS Report From the CIPPS Downloading Main Menu, enter your control agency code and an 'X' next to the selected report (10, U033, or U060). Then execute Function 6 or press Enter to display the Report Selection Screen for the selected report. The report selection screens display the most recent reports that were refreshed and are available for download.

Note on Procedures In the procedures that follow, detailed procedures and function descriptions are presented only for the Report 10 screens since the functions are identical for all reports within the CIPPS Reports Data Group.

Field Name Cross Reference While CIPPS-FINDS Data Field Selection Screen field names generally conform to CIPPS screen and report field names, there are some variations. The procedures for each Data Field Selection screen that follows include a detailed cross reference table between CIPPS-FINDS Data Field Selection Screen field names and CIPPS Report field names. CIPPS-FINDS Download field names, which will appear as column header names on downloaded data to facilitate data identification, are also included.

Field Name	Description
CIPPS-FINDS Data Field Selection Screen	In some cases, CIPPS-FINDS combines several CIPPS Report Field names together on the screen displays. If selected, all fields included in combined fields are downloaded. Data Fields designated as "KEY" are pre-selected and are included in all downloads executed for the respective CIPPS report.
CIPPS-FINDS Download	Due to field length limitations, CIPPS-FINDS Download Field names do not match the CIPPS field name or the Data Field name as it appears on the CIPPS-FINDS Data Selection screens.
CIPPS Report	The CIPPS Report Field name corresponding to the CIPPS-FINDS Data Field.

Report 10 - Report Selection

Selecting CIPPS Report 10 displays the CIPPS Downloading Report 0010 screen. The report 10 selection screen includes the "IND" column, which distinguishes between edit (scrub – no checks) and pay (certified – checks) report 10s. A 'Y' indicates an edit report, a blank indicates a pay report:

FUNCTION Enter applicable function:

Function	Description
5=Main Menu	Returns user to Main Menu, cancels request.
6/Enter=More Report	Displays more available reports.
7=Select Elements	Displays the Data Field Selection screen.
9 = Select All and Execute	Selects all the Data Field Selections and executes the request.

ACTION Enter 'X' next to the desired report(s) to make selection. Remember, the reports available are contingent on the designated Data Refresh option.

Report 10 - Data Field Selection

Use Data Field Selection screens to select which report data fields to include in the download. Any number of fields may be selected, but at least one data field must be selected for a successful download.

FUNCTION Enter applicable function following entry of data field selections:

Function	Description
5=Main Menu	Cancels request, returns user to the Main Menu.
7=Previous Screen	Displays Report Selection screen, deleting any data field selections.
9=Execute Request	Begins download, displays Dataset Information screen.

FIELD Enter 'X' next to the Data Field to be included in the download.
